

LOOK BOOK 20/21

beautiful design.

WWW.DEVON.CO.NZ

Bruce Barnes and Howard Sneddon started making outdoor furniture in an old tin shed in Newmarket, Auckland in the '70s. With Bruce's design qualifications and Howard's youthful exuberance they set out to build the "best outdoor furniture money could buy".

The business has changed dramatically over the years and Devon Furniture has been exported all over the world. One thing that hasn't changed since the '70s is people continue to buy Devon Furniture now for the same reasons they did all those years ago.

*“Style, comfort,
colour and durability.”*

Devon fulfils these criteria by using raw materials and methods of construction which are as timeless as the designs themselves.

The old tin shed has long since been demolished, but Devon is satisfied in the knowledge that the furniture they made back then is still out there, surviving everything that mother nature can throw at it.

Matthias Strickett

Managing Director, Matthias Strickett, purchased Devon in early 2019, heralding a new era for a truly great New Zealand brand. He brings a true passion for outdoor living and an obsession for detail and quality which will continue to be reflected in our collections for years to come.

A sustainable forest is a forest that's carefully managed so that as trees are felled, they are replaced with seedlings that eventually grow into mature trees. This is a carefully and skilfully managed system. The forest is a working environment, producing wood products such as wood pulp for the paper & card industry and wood-based materials for furniture manufacture and the construction industry. Great care is taken to ensure the safety of wildlife and to preserve the natural environment.

Devon only uses timber from sustainably grown Teak plantations in Indonesia

Beautiful design, *true craftsmanship*

The Devon way

Outdoor living is part of New Zealand life. It's where we relax, entertain and share with others. Why not do it in style with Devon?

What is it that makes Devon Outdoor Furniture stand out from the rest? We think the innovation and design speaks for itself. Behind that you'll find the best raw materials sourced from around the world, leading edge construction techniques that cut no corners, and the most important of all, a passion for outdoor living we bring to every piece of furniture made.

MIX & MATCH

The Devon Furniture range has been designed to give you the flexibility to mix and match to suit your outdoor space. Tables are the perfect starting point, then play with different chairs to pair with it. Explore our fabrics, mesh, weave and frame colours to create your outdoor style.

BARKER

Timeless, relaxed comfort

Our most popular dining chair, the Barker Chair, is simple yet stylish. With a generous cushioned seat and rounded armrests, this chair embodies the very essence of comfort, ideal for creating an inviting outdoor living space.

The Sunbrella fabrics are available in three natural colours, making the Barker Chair the perfect addition to any of our Devon tables.

FABRIC COLOURS

COLOUR RANGES

FABRIC

With a soft hand and sophisticated, trendsetting designs, Sunbrella is the ideal choice for a variety of applications, indoors and out.

COLOUR OPTIONS

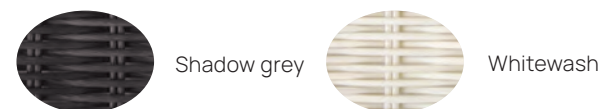

WEAVE

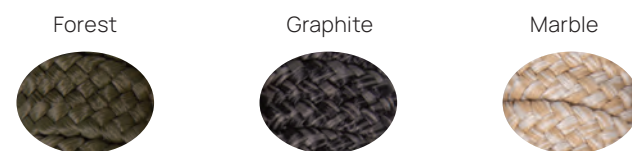

RAUCORD is a premium synthetic weaving material for outdoor furniture. Manufactured using renowned German engineering know-how and production technology, REHAU weaves are both stylish and very durable.

COLOUR OPTIONS

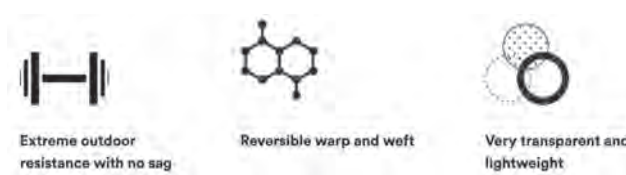

ROPE

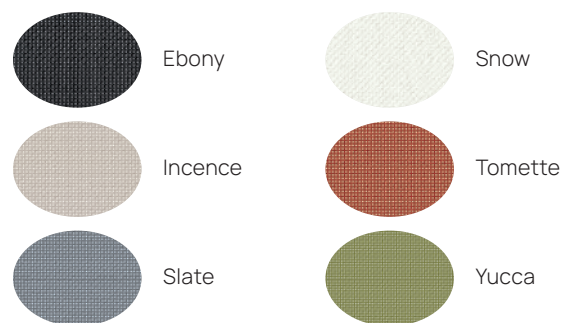

MESH

Batyline Fabrics make light, resistant and elegant mesh in a wide range of colours and a variety of weaves & textures. Batyline is extremely lightweight and durable, perfect for the diverse New Zealand climate.

COLOUR OPTIONS

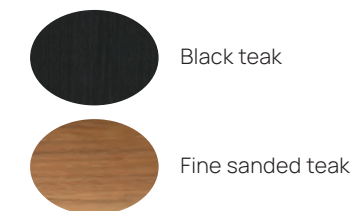

FRAME

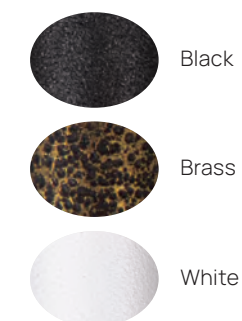

Devon Furniture only use the finest premium materials for our frames, solid fine sanded teak which is sustainable sourced and only the best aluminium.

TEAK COLOUR OPTIONS

ALUMINIUM COLOUR OPTIONS

TEAK

Teak is a durable, tropical hardwood timber, regarded for centuries as the ideal timber for boat building and furniture making where strength and longevity are required. Teak wood will survive for many years outdoors with little or no structural deterioration thanks to its highly water-resistant quality – it's even repellent to insects.

Devon's Teak furniture is finished by fine sanding and/or brushing. We then buff the surface of the Teak to draw out the naturally occurring extractives. A coat of timber furniture shield is applied to repel water and dirt and to protect your furniture.

TEAK CARE

If your furniture is inside, the natural honey colour of the Teak will slowly darken, while your outdoor Teak furniture will fade to a silver-grey patina. To maintain the natural honey colour, Teak care products can be purchased from select retail or hardware stores. Ensure you seek expert advice and you test any protectors, stains or oils on a small, inconspicuous area before applying so you are happy with colours.

As timber is a natural material, environmental elements do mean that the furniture needs to be properly maintained and protected. This will ensure your Devon Outdoor Furniture remains in good condition for years to come.

DEVON FABRIC

All Devon fabrics are woven from weather-resistant, highly durable acrylic fibres to create a colourfast fabric that won't fade, crack or tear. Plus, you'll find they stay cool even in the hot sun.

Our fabrics are sourced in the USA and Europe where they're used extensively for awnings and marine applications such as boat cushions – they were made to withstand the elements.

Our chair covers have been known to last upwards of 15 years outside, but on average you can expect between 7 and 10 years before re-covering is recommended. The Milford Lounge Collection uses Sunbrella Fabrics.

This fabric feels like an indoor fabric but is designed for outdoor use being easy-care and weather-friendly, resisting mildew, stains and fading – and includes Quick Dry Foam, a specialist free-draining foam designed for use all year round.

FABRIC CARE

Devon fabric is made from acrylic fibres that resist the growth of mould unless dirt is left on the fabric for extended periods of time. We recommend regular cleaning to prevent this, with a mild soap and lukewarm water solution.

SYNTHETIC WEAVE

Devon woven furniture uses synthetic weave, tightly woven by hand to achieve exceptional comfort and appearance. Synthetic weaves are high-performance outdoor materials – UV and fade resistant – and able to withstand extreme temperatures and harsh weather conditions.

Our synthetic weaves are made from polyethylene, which can be recycled completely residue-free.

WEAVE CARE

You can clean your Devon Furniture's weave simply by using a soft brush and a mild soap & clean water solution. Don't use any type of abrasive agent or scouring pad, as scratches can remain on the surface.

DESIGN & CONSTRUCTION

We believe the value of a Devon table doesn't rest on the table top. As with most things, it's what's going on underneath that counts, and for all Devon Furniture this includes construction that copes with the stresses of weight and movement admirably. Joints are designed to flex with the timber movement, and extreme weather conditions won't contort the furniture thanks to quality materials and precision design.

SHINY BITS

Some outdoor furniture suffers because of inferior fittings unable to withstand outdoor exposure, and in particular, salty coastline conditions. Not so with Devon furniture – all our fittings are made from quality stainless steel, aluminium and zinc alloy to prevent rust. Their natural Finish will keep shining through rain, shine, salt and water spray.
