### Winter Health & Safety

With the darker, colder and wetter weather, forklift operation is never more dangerous than it is now.

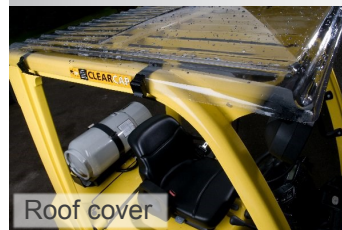

Lower visibility slippery conditions and colder temperature all contribute to a more hazardous work environment increasing the risk to health and safety!

At Momentum, we supply specialised parts and equipment in the health and safety sector to reduce your risk and enhance your productivity.

If you have a concern or question regarding Health and Safety in your work place, we can offer answers and solutions.
