THE FORKLIFT SPECIALISTS

CELEBRATING OVER 20 YEARS IN BUSINESS

HIRE, SERVICE & PARTS FOR ALL MAKES & MODELS OF FORKLIFTS

SALES OF NEW & USED MACHINES - ELECTRIC, PETROL/LPG & DIESEL

ONSITE WOF'S

Nelson Forktrucks Ltd is a proudly 100% Nelson NZ owned and operated company.

Quality solutions for all forklift requirements.

We specialise in **FORKLIFTS** and everything to do with **FORKLIFTS** – we lease – short and long term, sell – new and used machines - engine powered diesel, petrol/LPG **FORKLIFTS** and electric **FORKLIFTS**. We carry out a range of services/planned maintenance, do on-site WOF's/Safe Equipment Compliance Inspections, sell parts and stock a range of backup products ie forks, seats, tyres etc. **Your one stop FORKLIFT shop.**

We have five mobile service vehicles set up to visit you at your premises and carry out most **FORKLIFT** repairs, planned maintenance and on-site WOF's & SEC (Safe Equipment Compliance). For the bigger jobs we have a fully equipped workshop and can arrange to have your machine transported to us for repair.

www.nelsonforktrucks.co.nz/about-us

years ago, working from home with one service van. Now we have a team of people working with us from our Office at 10 Cargill Place Richmond. We are Head Office and can be really flexible when it comes to our client's needs – and decisions can be made quickly – we don't need to talk to anyone else.

We moved into Head Office premises in Cargill Place in Richmond in 1996. This base is central to support the range of industry we have in our Nelson area, horticulture, timber and fishing. Here we have a full workshop and steam cleaning facility. We also have space for an extensive range of parts for all makes and models of forklifts. There is also our display yard for demonstration of our forklifts and our offices.

Click on our link www.nelsonforktrucks.co.nz/about-us/meet-the-team to meet the individual members that make up NFL.

Our business moto's

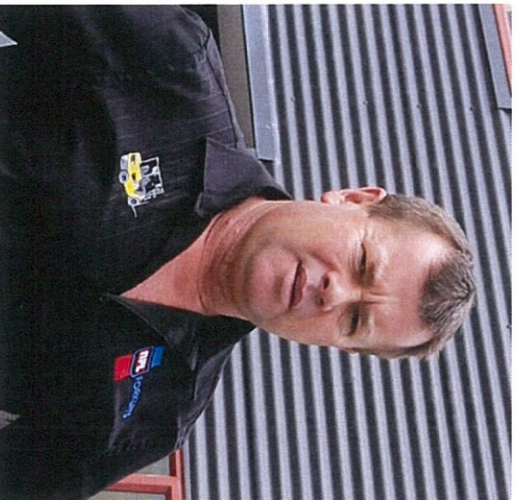

Our Values - *Pride - quality products & workmanship - Honesty - do the right thing - Loyalty - to clients & suppliers, working through issues - Initiative - thinking ahead - Fun - celebrate the wins, teamwork.*

Our Purpose Statement - NZ's most experienced forklift specialists providing your business with quality solutions.

Our Value Proposition - We are locally owned and operated and this means we can make decision that other companies can't. Our service offering is personalised to your needs which is backed up by the most experienced forklift specialist in NZ. Keeping you operational is our focus, we will "lend" you a forklift if you need one.

Forklift Sales – new and used.

Nelson Forktrucks Ltd operates independently - we are no one's agent. We offer independent solutions specific to our client's requirements.

Call Kim and he can come around and assess what you need for your workplace. If you're looking at purchasing a used forklift from Trade Me etc take Kim along to give it an appraisal. Kim has been a qualified forklift mechanic for over 30 years.

We specialise in **FORKLIFT** Servicing in the local **TOP OF THE SOUTH**, we have regular trips to Marlborough, West Coast and Golden Bay, and regular trips also to Canterbury. Our clients are generally part of our Planned Maintenance program and therefore breakdowns are almost eliminated. However for any unforeseen trouble we assess the need to travel there ourselves or use our back-up support in local areas. We have five vehicles set up for onsite servicing so can be in many places at the same time. We also travel to areas outside this also as the need arises, we have rental clients down as far as Dunedin in the South Island. Over the years we have grown to accommodate the needs of our clients who have grown their business into these other areas and have continued to support them by traveling. Generally trips to these areas are due only every six months but we can be flexible – remember we are Head Office and can be really flexible when it comes to our client's needs – and decisions are made quickly – we don't need to talk to anyone else.

We believe – you get what you pay for – we won't be the cheapest but you will get a good deal – a job done right, and in the long run that does work out more cost effective.

We endeavour to do the job properly the first time – and if it's not we'll fix it – guaranteed.

Our FORKLIFT Services include:

- [Planned Maintenance Programs](#)
- [On Site WOF Inspections](#)
- [Safe Equipment Compliance Inspections](#)
- [Weekly/Monthly Checks](#)

NFL takes Health and Safety at Work seriously

Nelson Forktrucks can help you with your requirements under the act.

NFL can help you comply with your obligations under the new Act by;

- Give advice on what you require for your forklift;
 - Does your forklift require Registration and Warrant of Fitness? We assess **where** you are using your forklift.
- Arrange Rego & WOF Initial Registration with LTSA (\$190) of your forklift in the correct class (just like your car this includes # plates and proof of ownership) once this initial registration is completed you will receive the reminders for registration directly from LTSA (\$60) per year.

- guidelines and issue a 'Safe Equipment Compliance' sticker for your forklift.
- Providing a paperwork system that you can keep as proof of your maintenance system which includes
 - Providing the client with a copy of the Warrant of Fitness/Safe Forklift Inspection and relevant Planned Maintenance Inspections.
- NFL have available for purchase (\$65 incl) the NZS Standards book, which should be kept with each forklift, this booklet is a comprehensive instruction on every aspect of forklift ownership, your obligations, the specifications, the operator's responsibilities. Our copy includes a page to note all the specifications of each forklift and a daily operator checklist for operators use.
- Monitoring how often you need to have your forklift checked and maintained (depending on your usage, hours & place of use, as per the manufacturers recommendations) and remind you when and what is due.
- Providing safe products and parts, and safety products, ie man cage, attachments, signage, warning decals etc.
- Providing safe working rental forklifts, long or short term.
- Advising you were you can get your staff trained for forklift operation and "F" endorsement licences.

Offering solutions around "Contractors Onsite" – our NFL staff.

- Our service vehicles are self-sufficient, we carry all of own PPSE, eyes, muffs, vest, hard hat, gloves etc
- We carry our own fire extinguisher & First Aid kit and our technicians are trained First Aiders.
- If you designate an area for us to work in, (mark it off and put it on your site plan) we will use our own cones and barriers to provide a safe working environment – this way we won't need to know all the hazards of your whole site, just the basics like signing in and out at the office.
- We carry 'lock out' tags – so that we can lock out unsafe machinery and eliminate this from use, until the repair is completed and tag is removed by us.
- We have a hot or noisy work procedure which involves getting authority from the site supervisor prior to doing this; generally this type of work is carried out offsite in our workshop and should only apply in a breakdown situation.

NFL have a Client Health & Safety Log in area on our website, from here you can view and print what you require

- Our H & S Plan
- LTSA Authorisation
- First Aid Certificates
- Qualifications
- OSH Forklift Operators Certificates
- Public Liability Insurance Certificate
- Hazard Control Procedure
- Lock Out Procedure

Current NZ Safety Standard for Industrial Lift Trucks NZS/ANS/ITSDF B56.1 2005 Updated 2009

This booklet is the approved NZ Safety Standard for Low Lift and High Lift Trucks, powered and non powered industrial trucks. This is a comprehensive booklet on all aspects of Forklift

machine.

I note particular interest in

- Rule 4 General Safety Practices - which has relevance regarding modifications, nameplates etc and the operation of the forklift, 4.19 Operator Training - which states that personnel have to be trained , and goes on to state what should be in the training program - *we get our staff trained by an outside company that specialise in this area.*
- Rule 5 Operator Responsibilities, which has many rules about operation and modification, but of particular interest is Rule 5.5 which clarifies what the operator is required to check on the forklift prior to each shift.
- Rule 6.2 Maintenance and Inspection - Scheduled planned maintenance should be followed in accordance with the manufacturer's specifications, by trained authorised personnel. This rule also states that the machines should be regularly cleaned so that cracks and broken parts can be observed.

We believe a copy of this booklet or the Operators Manual for each forklift should be kept with the machine for reference for the driver and owner of the forklift.
