

Tasman Community Emergency Preparedness Plan

(Section A)

This Community Emergency Preparedness Plan is a living document created by and for the **[TASMAN AREA]** community.

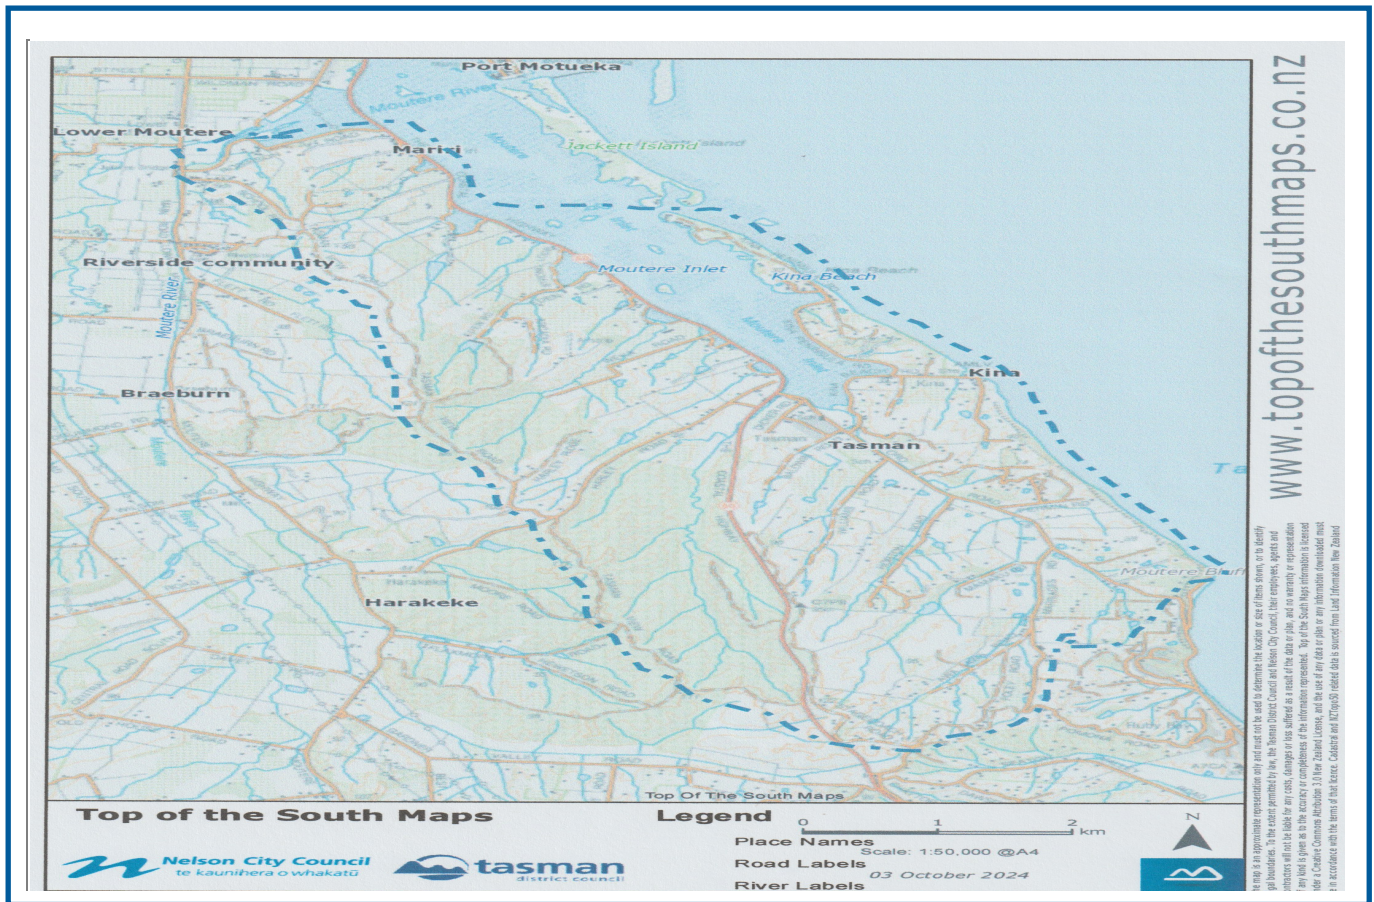

Its purpose is to:

- Enable, empower, and support individuals and our community to take ownership of our own emergency preparedness.
- Increase the resilience of our community to the impacts of hazards.
- Promote problem solving and encourage our community to be self-sufficient through strong social networks and a culture of mutual help.
- Reduce the reliance on first responder agencies.

Why have a plan?

Because when emergencies happen, our community may need to be self-sufficient for several days.

Area covered by this plan

About our community

Widespread rural, coastal, relatively sheltered community. Ridges & broad valleys landscape with Moutere Inlet sheltered by Kina Peninsula and Jockett Island.

Small urban area in Tasman village, otherwise low density rural properties & productive agricultural land. Approx. 550 households (1250 - 1500 people) & steadily increasing.

Coastal cliffs but easy access to Tasman Bay & Moutere Inlet shoreline at several points.

Tasman Taste Trail encourages frequent cycling & walking.

Most workers commute to Motueka, Richmond/Nelson & Mapua.

Many residents are retirees & self-employed workers. Tasman village has 2 schools with a combined roll of about 200 primary age students.

Our area is defined mainly by stream catchments feeding the Aporo/Tasman stream & Moutere Inlet. Aporo/Tasman stream is subject to flooding during significant rainfall. The area has occasionally experienced small tornados and fires have occurred during increasingly frequent droughts.]

Known and potential hazards

**Slope
instability**

**Severe
weather
/ flood**

Rural fire

Earthquake

Tsunami

Pandemic

Other

Hazard	Possible impact	Possible challenge	Ways we can prepare
[FIRE	Damage to or destruction of housing & businesses. Roads closed. Personal injury. Please Note: The name "CD Centre" is not now used for the potential evacuation or information point. Emergency Assistance Centre (EAC) is now used.	Fast spreading. Isolated properties. People cut off from family & escape routes. Need to assist people with mobility issues.	Minimise trees close to property. Clean gutters. Property escape plans. Rapid warnings. Comply with district fire status updates. Refer to page 9 for website info.
[SEVERE WEATHER & FLOODING	Damage to properties, roads, infrastructure. Blocked roads due to slips, fallen trees, as well as floods. Latter especially along Aporo/Tasman stream. Isolation.	Access to cut off people & properties due to fallen trees, slips or flooding. Impassable bridges. Isolated family members. Power outage can affect communication.	Clear drains. Regular stream monitoring. Notify TDC about obstructions & any damage to roads. Check weather forecasts frequently. Instal back-up power.
[EARTHQUAKE	[Potential for mild to catastrophic damage to property/infrastructure. Damage likely to be widespread across numerous structures. Potential for injury & loss of life. Possible tsunami (see below).	[No to little warning. Impassable roads due to slips/land distortion: fallen trees & potential for flooding. Perhaps many days of isolation & failed infrastructure. Extreme personal & business disruption. Separated families. Possible damage to EAC.	[Emergency kit & family escape/rendezvous Plans. Awareness of EAC & alternative meeting/shelter points. Ability to aid vulnerable people. Secure an alternative location for EA team to operate from in event the Church is unusable.

[TSUNAMI	[Infrastructure, roads & property damage. Massive debris piles blocking roads. Potential for loss of life or injury. Power outages. Potential damage to Emergency Assistance Centre (EAC) from large tsunami.	[Low lying land & housing in Tasman village potentially exposed. Also Mariri & Kina coastal areas. Separated families. Damage to roads by or close to the coast e.g. SH60 to Motueka & Aporo & Kina Peninsula roads. EAC could be impacted by major tsunami.	[Awareness of exposed areas. Assess how to help vulnerable people. Rapid communication. Back-up power could be needed. Have escape plan to high ground. Secure an alternative location for EA team to operate from in event the Church is unusable.
[STORM/ TORNADO	[Infrastructure, roads & property damage. Flooding possible. Fallen trees blocking roads. Potential for loss of life or injury.	[Be aware of weather forecast & any severe weather warnings. Perhaps little to no local warning. Separated families. Blocked or damaged roads. Property destruction.	[Communication. Risk awareness. Ensure no trees could fall on house/cause isolation. Escape or shelter plan & emergency kit.
[PANDEMIC	[Widespread illness. Entire families or even communities impacted. Isolation. Health services could potentially be compromised Potential death at home.	[Risk of additional infection. Inability to re-stock household supplies. Perhaps difficult or restricted access to medical care. How to aid vulnerable people.	[Good hygiene. Current vaccinations. Sensible precautions. Food & water for several days in emergency kit.
[LANDSLIPS	[Low risk but possible. Blocked roads. Stream flooding. Property damage. Potential for injury or worse.	[Isolation & access. Earth-moving resources may well have priority elsewhere. Requirement for earth-moving equipment & land stabilisation.	[Awareness of potential risk points/areas. Inform TDC about potential risk sites.

Potential gathering places

If you can't stay home or with family and friends or are searching for each other these are possible gathering places or Community Led Centres.

Hazard type	Potential gathering places	Facilities for animals
[FIRE & TORNADO	[Tasman Church / Community Emergency Assistance Centre (EAC) corner of Aporo & Williams Roads.	[Some fenced land at church but only suitable for domestic animals in box/cage or on lead: not stock. Option for stock on plenty of fenced land nearby Tasman church & elsewhere if needed.
[STREAM FLOODING, FALLEN TREES & LANDSLIPS.	[Tasman Church / Community Emergency Assistance Centre (EAC) corner of Aporo & Williams Roads.	[As above & consult survey response info.
[TSUNAMI	[Tasman Church / Community Emergency Assistance Centre (EAC) unless large tsunami predicted. Tasman Motor Camp can be a safe temporary alternative.	[As above.
[EARTHQUAKE	[Tasman Church / Community Emergency Assistance Centre (EAC) unless large Tsunami is predicted.	[As above.

Communications tools

When telecommunications are working	Mobile Phones, Facebook, WhatsApp, Antenno for TDC info. Refer to page 10 of this plan. Potential to use TACA email & phone databases. Also Facebook. Emergency Assistance Centre (EAC) VHF Radio to compatible radios. UHF radios.
When telecommunications are NOT working	Emergency Assistance Centre (EAC) VHF Radio connects with NTEM. Potential to use privately owned walkie-talkie & vehicle UHF radios, but these won't communicate with VHF. Battery or vehicle radio for information & status updates. Starlink could be useful. Display info on hand written posters at sites where people may congregate e.g. Tasman Store, Schools, EAC, Jester House, Kina Garden House, Tasman Motor Camp, Golf Club.

Our community resources

(Who have given permission to be listed in this plan)

Category	What / Who
Businesses	Several builders & tradies. Commercial & private individual food provision outlets. Civil & structural engineering company resources. Consult community survey spreadsheet data.
Kit and equipment	Numerous 4WDs, Tractors & other rural equipment. Generators etc. Drone users. Refer to Survey Spreadsheet. Neighbourhood Support may have useful lists.
Community members with specialist skills	Various Medical Specialists. Builders & Tradies. Catering. People Management, including in healthcare. Stock Management & Farming. Civil & Structural Engineering. Refer to Survey Spreadsheet.

Full contact details of people with or who are community resources are held (by permission of the individual) by the Community Emergency Team.

Our Community Emergency Team

(Who have given permission to be listed in this plan)

It's important to have a primary and secondary point of contact for the community so information can be gathered and conveyed allowing for a coordinated community response to occur.

	Name	Contact details
Primary information point of contact	[ANNA LOVELL	[021 223 4008 annamjlovell@gmail.com
Secondary information point of contact	[DAWN UNDERWOOD	[022 367 0062 dawnfdu@gmail.com

A full list of the Community Emergency Team contacts is held by team members.

Disclaimer:

A completed Community Emergency Preparedness Plan will contain information that has been inserted by your community. NTEM therefore cannot guarantee the completeness, accuracy, or currency of that information, nor its usefulness in any emergency event.

NTEM provides general guidance with respect to the completion of a Community Emergency Preparedness Plan, however NTEM will not assess the appropriateness or otherwise of any community-stated actions proposed within the plan. NTEM therefore assumes no liability in connection with such actions, and it is your community's responsibility in completing the Community Emergency Preparedness Plan to consider any risks which might be related to such actions.

Privacy statement:

In completing this Plan, the community members confirm they are aware that any personal information provided in its preparation has been collected and may be used and disclosed for the response to and the management of an emergency event, in accordance with the Privacy Act 2002 and the Civil Defence National Emergencies (Information Sharing) Code 2020. This includes that the personal information provided may be disclosed for these purposes to other members of their community, NTEM and any public sector agency and/or any agency that is, or is likely to be, involved in managing, or assisting in the management of, the emergency.

In the event of an emergency NTEM endeavours to establish contact and support communities as soon as possible. The nature of an event may prove to make this difficult.

Where life or significant property is at risk, call 111.

Ministry for Primary Industries
Manatū Ahu Matua

Things you can do now to prepare for an emergency

- Create a central point of contact outside your community for your family in an emergency.
- Consider who in your community may need extra support during an emergency.
- Have a discussion with them on how you might be able to support them.
- Make a household plan | <https://getready.govt.nz/en/>
- Make a pet/animal plan | <https://www.mpi.govt.nz/animals/animal-welfare/animal-welfare-emergency-management/preparing-animals-for-emergencies/>
- Have a 'grab bag' ready for an emergency | <https://getready.govt.nz/en/prepared/household/supplies/>
- Become a member of 'Top of the South Neighbourhood Support' and join 'Gets Ready' | <https://www.neighbourhoodsupport.nz/>
- Check out Fire and Emergency New Zealand | <https://www.fireandemergency.nz/outdoor-and-rural-fire-safety/councils-and-community/your-community-responsibility/>
| <https://www.fireandemergency.nz/assets/Documents/At-home/Make-Your-Home-and-Family-Fire-Safe.pdf>

During an emergency event

Call 111 if life or significant property is at risk.

Shelter in place if it is safe to do so.

Follow your Community Emergency Preparedness Plan.

Staying informed before and during an emergency
