

AQUAMOX BASE SPEC SHEET

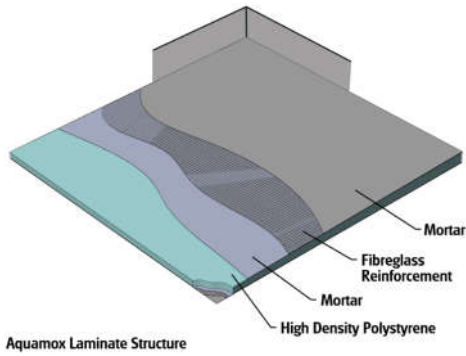

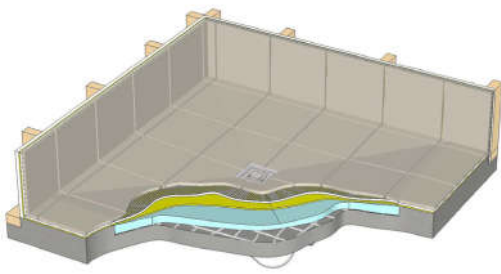

PRODUCT OVERVIEW

Aquamox Bases are the solution to an affordable, easy to install tile over base that follows industry installation methods and product testing. Aquamox Bases come in a wide range of common sizes while still remaining easy to customise and modify. Suited to all floor and wall types, Aquamox Bases are adaptable to new builds and renovations alike.

Aquamox Bases offer a 10 year product warranty and with it's mortar reinforcement and high density polystyrene construction means it has greater rigidity and sturdiness - this in turn means no on site damage during installation.

A pre sloped base replaces the traditional scree and mortar process, saving hours of application and curing time on site.

With standard LH and RH corner and Alcove configurations, and Centre and Channel Waste drain options, Aquamox Bases offer the perfect solution for any tile over shower.
