cleaning & maintenance

IMPORTANT Do not use solvent cleaner of any description to clean Gradus products. Floor sealants and polishes should not be used as these will reduce slip-resistant properties and could prove hazardous. Particular care should be taken to avoid cross contamination occurring during the cleaning of other adjacent surfaces. Stair edgings provide an essential slip-resistant function and therefore a regular cleaning and maintenance programme is essential to avoid the build up of dirt and/or grease, which will be detrimental to the slip-resistance of the product.

For full cleaning and maintenance instructions contact Gilt Edge Industries Ltd.
